Masonry Screws

Bremick Masonry Screws are a light duty anchor for fastening metal plates and timber to masonry substrates such as concrete, brick and block without the need for a plug.

- Serrated Hi-Lo thread cuts into masonry and offers superior pull-out performance
- Ideal for close to edge applications – non-expansive
- Easy to install using the Torx bit provided in each pack
- Adjustable and fully removable

Threaded Rod Hangers

Bremick Threaded Rod Hangers are a specialised fastening solution used to secure threaded rod in construction and industrial applications.

They provide a strong, reliable attachment point for suspending pipes, HVAC systems, cable trays, and other overhead installations.

- One-Piece design simplifies installation by eliminating the need for multiple components
- Designed to suspend threaded rod in either vertical or horizontal applications
- Hex shaped head for easy installation
